## SKILLS

---

**Programming Languages:** JavaScript (ES6+), PHP, Python, SQL

**Web Development:** HTML5, CSS3, Sass, BEM, Bootstrap, React, JSON, Ajax, Jasmine, Git/Github, command-line interface, WordPress, SEO, cross-browser compatibility, Figma, Adobe XD

## PROJECTS & EXPERIENCE

---

**Coffee Shop Theme** [Live Demo](#) [Source Code](#) **February 2021**

- Created a WordPress e-commerce theme using PHP, JavaScript, and SCSS.
- Built page templates and custom post types to let merchants add or update information about products and menu items.
- Customized endpoints for the WordPress REST API to display search results.
- Set up WooCommerce plugin to add e-commerce functionality.

**Arch Studio Multi-Page Website** [Live Demo](#) [Source Code](#) **December 2020**

- Built a fully-responsive 4-page website using HTML, SCSS, and JavaScript.
- Added map component using Leaflet JS and input validation.
- Applied CSS grid and media queries for responsive design.

**Movie App** [Live Demo](#) [Source Code](#) **November 2020**

- Developed a React app allowing users to view movie information.
- Users can check out featured movies, search for movies, and click on poster images to read movie details.
- Used React Router to handle routing and The Movie Database API to fetch data from.

**Currency Converter** [Live Demo](#) [Source Code](#) **October 2020**

- Implemented a React app allowing users to convert one currency to another.
- Users can enter an amount, select the actual currency, select the desired currency and the app fetches the exchange rate from the Frankfurter API.

## EDUCATION

---
