WORK EXPERIENCE

Found Search Marketing

Remote (San Diego, CA)

Front-End Developer

Oct 2021 – Present

- Develop and maintain 150+ responsive landing pages using HTML, CSS, JavaScript, and jQuery; translate wireframes and design concepts into production-ready pages with cross-browser compatibility
- Design A/B test variants and experimentation strategies; launch and manage 350+ experiments, track metrics, and analyze results to drive conversion improvements
- Build custom form solutions with client-side validation and CRM integration; implement JavaScript functionality using third-party libraries and custom scripts to extend platform capabilities
- Optimize page performance achieving ~25% reduction in load times through asset compression, lazy loading, and script optimization to meet Core Web Vitals targets
- Build reusable component library and script templates to standardize development and accelerate team velocity
- Automate monitoring and alerting systems; troubleshoot issues, reducing incident response time to under 30 minutes
- Develop and maintain WordPress sites; publish blog content, apply custom CSS, manage plugins, and troubleshoot performance issues
- Perform comprehensive QA including UI responsiveness, form functionality, WCAG accessibility, and cross-device testing
- Coordinate cross-functional review workflows with operations and clients to gather feedback and implement revisions
- Serve as primary technical resource for landing page development; maintain documentation and research new tools to improve efficiency

PROJECTS

VibeFlow – AI Playlist Generator | vibeflow-rust.vercel.app

- Built full-stack AI playlist generator with Next.js, integrating OpenAI and Spotify Web API to translate mood descriptions into curated playlists via parallel search queries with fingerprint-based deduplication
- Designed versioned playlist data model in Supabase enabling instant client-side rollback without additional API calls
- Integrated Supabase auth with session restoration and parallel data fetching for user playlists, version history, and bookmarks
- Implemented responsive layout using Tailwind CSS and Framer Motion featuring persistent Spotify embed player and full keyboard navigation
- Generated dynamic Open Graph images server-side using Next.js ImageResponse for rich social link previews

Frame – Cinematic Scroll Experience | frame-iota-eight.vercel.app

- Built cinematic scroll experience with Next.js using Framer Motion for component animations and GSAP ScrollTrigger for pinned timeline sequences
- Engineered custom scroll-driven animation system with reusable useSceneScroll hook that supports reduced-motion accessibility standards
- Designed design token system bridging CSS custom properties into Tailwind CSS with centralized easing library

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java, PHP

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, jQuery, GSAP, Framer Motion, Bootstrap

Backend & APIs: Node.js, Express, REST APIs, Supabase, MySQL, MongoDB, Spring Boot

Tools & Platforms: Git, GitHub, npm, WordPress, Unbounce, ESLint, Figma, VWO, BrowserStack, Ghost Inspector, Visualping, Google Analytics

Additional: Responsive Design, WCAG Accessibility, A/B Testing, Performance Optimization

EDUCATION

University of California, Berkeley

B.A. in Applied Mathematics

Berkeley, CA

May 2020
